### **The Oxford Vocal (OxVoc) Sounds Database**

Many thanks for your interest in using the OxVoc Sounds database in your research. We would ask that you read and sign the following statement and return to Dr. Christine Parsons ([Christine.parsons@clin.au.dk](mailto:Christine.parsons@clin.au.dk)).

I agree that:

- 1) I will use sounds for research purposes only and will destroy the sounds once the research is complete
- 2) I will obtain Ethical approval from the relevant committee for each study in which these sounds are used
- 3) I will not pass the sounds on to other researchers
- 4) I will not use the sounds in any publication
- 5) I will acknowledge the source of the data set and paper Parsons C, Young K, Stein A, Craske M and Kringelbach ML(2014). Introducing the Oxford Vocal (OxVoc) Sounds Database: A validated set of non-acted affective sounds from human infants, adults and domestic animals. *Front. Psychol.* 5:562.
- 6) I will send a copy of all publications using the OxVoc database to Morten Kringelbach.
